

MAVINOVO AI

The Enterprise AI Platform That Actually Works

12 years of enterprise engineering. Zero dependencies. Infinite possibilities.

Built for organizations that demand security, compliance, and performance.

Third-Party Dependencies

THE PROBLEM WITH CURRENT SOLUTIONS

Today's workflow automation platforms promise simplicity but deliver complexity.

n8n, Stack AI, Make.com, and Zapier are assemblies of open-source parts—layers of Docker, Kubernetes, Node.js, Python scripts, and countless npm packages. They're fragile. They're slow. And they're a security nightmare.

For enterprises that handle sensitive data—accounting firms, healthcare organizations, logistics companies, compliance-driven businesses—these platforms simply don't cut it.

No real auditing — just basic run logs that don't meet compliance requirements

Vulnerability exposure — npm, Python packages, and open-source dependencies = constant security patches

Cloud lock-in — SaaS-only or complex Docker installations with no air-gap option

High latency & cost — multi-hop API calls, external webhooks, and ballooning compute expenses

Your business deserves better.

INTRODUCING MAVINOVO AI

MaviNovo AI is built on **MN2**—a fully self-contained enterprise framework engineered over 12 years for one purpose: to deliver AI-powered business operations that actually work in the real world.

"No lock-ins, no blind dependencies, no surprises."

MN2 removes internal latency, fully utilizes every resource, and delivers the fastest, leanest, most cost-efficient platform in its class.

WHY MAVINOVO AI WINS

◆ Enterprise-Grade Auditing

Every field change. Every workflow action. Every user action. Full data lineage and chain-of-custody—straight from the database. Mission-critical for professional services, accounting, healthcare, and compliance systems.

◆ Zero-Bloat Architecture

Single lightweight Tomcat + MySQL architecture maximizes CPU throughput, network efficiency, and disk operations. Handle enterprise-scale workflows on a fraction of the infrastructure cost.

◆ Maximum Security, Minimal Attack Surface

Built in Java with extremely small attack surface. Immune to Log4j-style vulnerabilities. No npm. No Python package sprawl. No modern node-based security nightmares.

◆ Deploy Anywhere

On-prem. Private cloud. Air-gapped. DigitalOcean. Bare metal. Hybrid. Client-controlled networks. Runs anywhere with nothing more than SSH.

◆ **True Backend/Frontend Separation**

JSON-based AJAX services let you redesign the UI, add mobile clients, or white-label for clients—without touching backend logic. Future-proof by design.

◆ **Real Business Systems, Not Webhook Glue**

Roles, tasks, pipelines, case management, data extraction (MaviSnap), compliance, reporting—full business functions, not just API connectors.

THE COMPETITIVE DIFFERENCE

Capability	MaviNovo AI	Competitors
Enterprise auditing & chain-of-custody	✓ Built-in	X Not available
Third-party dependencies	✓ Zero	X Hundreds
On-prem / air-gap deployment	✓ Yes	X Limited/None
Security attack surface	✓ Minimal	X Large
White-label capability	✓ Native	X Not designed
Multi-tenant enterprise	✓ Purpose-built	X Bolted on
Full business workflows	✓ Complete	X Task automation only
Performance at scale	✓ Instant	X High latency

BUILT FOR ORGANIZATIONS THAT DEMAND MORE

MaviNovo AI was designed from the ground up for high-friction, revenue-generating business problems—not hobby automation.

<p>Accounting & Financial Services</p> <p>Compliance workflows, audit trails, secure client data handling</p>	<p>Healthcare Organizations</p> <p>AI governance, ESR/SDOH workflows, HIPAA-ready infrastructure</p>
<p>Transportation & Logistics</p> <p>Order status automation, operational workflows, real-time tracking</p>	<p>Professional Services Firms</p> <p>White-label AI products, recurring revenue streams, embedded workflows</p>
<p>Enterprise IT & MSPs</p> <p>Multi-tenant deployments, isolated data, linear scalability</p>	<p>Private Equity & Consulting</p> <p>HR-Assistant, Sales-Assistant, custom AI infrastructure</p>

BUILD YOUR AI BUSINESS

MaviNovo AI is uniquely designed to enable professional services firms to:

- ✓ White-label your own AI product under your brand
- ✓ Integrate AI directly into your existing services
- ✓ Generate new recurring revenue streams
- ✓ Embed custom workflows that solve real client problems

MaviNovo becomes the **AI infrastructure** powering your firm's next chapter of growth.

Ready to Transform Your Operations?
